RE: Site Inspection, Lanny Jensen, Cream Time Quarry, S/039/009, Sanpete County, Utah

Date of Inspection: May 23, 2001
Time of Inspection: 9:30 a.m.
Conditions: Clear, warm
Participants: Zack Jensen, Cream Time Quarry; and Lynn Kunzler, DOGM

Purpose of Inspection: Document site conditions.

Upon arrival at the site, it was noted that the markers between this site and the Mayfield Quarry (s/039/011) had not been installed. It appeared as if no one was at the site this day. However, a new work area has been established to the north of the ridge. Zack Jensen and a crew of 2 were working at this location. I discussed the fact that Mr. Bown had not installed the markers between the two sites as agreed upon during the last inspection. Mr. Jensen indicated that he had about eight t-posts at home that he would bring the next day.

The disturbed area has been expanded since the last inspection (on April 25, 2001). It now appears that the 5-acre limit for a SMO had been exceeded. Using the GPS, the perimeter of the disturbed area was surveyed. Mr. Jensen was informed that it appeared that he was over five acres and that there cannot be any more expansion without first obtaining a Large Mining Operation or reclaiming a portion of the site. He indicated that reclamation of a portion of the disturbance will begin within the next week or two.

Results of the GPS survey show the disturbed area to be 6.06 acres. Mr. Jensen needs to be notified of this potential non-compliance and provide a plan to correct it.

Several photos were taken to document site conditions.
